## PROFILE

I recently completed the Bioversity Biotech Career Foundations Certificate Program, designed and taught by the Massachusetts College of Pharmacy and Health Sciences. After ten years of professional experience in the nursing assistant field, I am eager to leverage my transferable skills and technical training to transition into an early-career lab operations role.

## Technical Training and Professional Skills

- Handling and safety protocols for CO<sub>2</sub>, liquid nitrogen, and dry ice
- Solution and buffer preparation, molarity, dilutions, and unit conversions
- Use of essential lab equipment: pH meters, spectrophotometers, stirring plates, fume hoods
- Teamwork & Communication: Communicate critical information between shifts, including patient updates, safety incidents, new admissions, and discharges, to support seamless coordination and enhance the patient experience.
- Prioritization: Provide care and ensure the safety of 8–13 clients daily, focusing on fall prevention, incident avoidance, and managing unsafe behaviors; also assisted with meal preparation, patient transfers, and daily living activities.

## EDUCATION

**Bioversity – Biotech Career Foundations**  
Certificate of Completion

August 2025

**Bunker Hill Community College**  
Bunker Hill Hemodialysis Technician Coarse

Target Completion June 2026
